Berkley Specialty Excess
| a Berkley Company

PRODUCT POLLUTION LIABILITY

Product Pollution Liability refers to the contamination or environmental damage caused by the production and use of various goods and commodities. It encompasses the negative impacts that arise throughout the lifecycle of a product, including manufacturing, distribution, consumption, and eventual disposal. Product pollution can result from a wide range of sources, such as industrial processes, agricultural practices, and consumer goods.

COVERAGE

- Can be written as a stand-alone placement or combined in a package
- Excess limits for both supported and unsupported primaries can be considered
- Discontinued Products stand-alone placements can be considered

Actual coverage will be based on risk selection. For detailed review of coverage forms, specimen forms are available upon request.
